

Safesiri Thailand Co.,Ltd

Our team is your team.

COMPANY
PROFILE

2021 YEAR

International Occupational Safety Training Centre
Certify and maintenance services all kinds of engineering field

One stop safety

Comprehensive service in engineering safety and safety training course as law and regulations. By a professional team with equipment that has received international standards.

Safety training Course

Over 100 occupational safety training courses.

Crane Certificate Inspection Service

An inspection in accordance with Form PorJor.1 / PorJor.2 concerning components and equipment of cranes according to the type and nature of work with the rules prescribed.

Inspection of Electrical

Factory electrical inspection and Maintenance of all types of electrical systems.

Inspection of fire alarm system

Inspection smoke, heat detectors and all types of fire alarm buttons.

Inspection of fire extinguishing system

Water pump system for firefighting NFPA standards.

Safety Products

Over 500 imported PPE equipment

Operations can be managed efficiently with modernly working system work system.
Working tool was certified ISO 9001:2015.

Support
Products

Experts from Safesiri provides to support after service.

Web Service

Necessary information on the website allows customers can be studied all time.

Downloads

Documents can be downloaded for free, such as manuals, standards, regulations etc.,

Support and Talk

24 hours online support.

Engineering support

Free expert consultation.

The best after service.

Warranty and Fixing

Comforted support all services under warranty.

Supportly right away over online chat, appointment, repairs and many more.

“

Over the years Safesiri has been trusted by
more than 1,000 companies.

”

Customer Service

Safesiri was received officially authorized

NO. จป. 63 - 010

NO. ๒๓.1702

FS 718832

Safesiri was received officially authorized by Department of Labor Protection and Welfare Occupational safety training center and controller engineering practitioner Juristic Type in the field of inspection engineering and maintenance also

International Standard ISO 9001:2015

Quality Policy Our mission is we committed to emphasize human development and services to be best quality upon customer satisfaction including continuous improvement according to standards ISO 9001:2015

Following scope: The provision of training service, inspection and maintenance for safety system and trading of safety equipment and tool.

Occupational Safety Officer Course for Chief, Executive and CDC level.

Ministerial Regulations Determining Standards for Management and Operations on Occupational Safety, Health and Working Environment B.E. 2549

In-House Training and Public Training

Safety Chief Safety Supervisor

Safety Executive Safety Management

The Committee of Occupational Safety (CDC)

In House and Public Training

Nationwide service

“Technical essential for working safe”

Learning

Stimulate into creative thinking

Begin with Safesiri

Fieldwork training centre meets international standards.
Can Practice and use various safety protection devices.
Coaching team closely guideline also.

Public Safety Training center

Public Training

At Saraburi.

Free Coffee break/Lunch
Free WIFI
Hotel closely
50% discount room booking

2 days training
12 hrs. /day
Certificate

According to the legally Occupational Safety Officer training Course. Learn to be safety leadership.
Learn to manage safety as professional. Compliance as the legally required and can be processed.
And encouragement for sustainable occupational safety technical.

Training Center

+ 100 course

SAFESIRI TRAINING CENTER

Favourite Course

Working at height condition Course

First Aid Course

Orientation new staff Course

In-House Confined Space Training Course

Over 100 Occupational safety training course Can Practice and use various safety protection devices. Coaching team closely guideline also.

หลักสูตรแนะนำ

Crane working

Review of working with cranes.

Chemicals working

How to work with chemicals and storage.

Electrical working

Working on electricity according to the announcement of the Department of Welfare.

New employee

Work safety for new employees

Forklift

forklift driving and maintain

Fire Watch Man

Technical to be wary of fire as international standards

Scaffolding

installation: installation and maintain scaffolding

Noise pollution

Noise pollution, Hearing Conservative

SAFESIRI เซฟสิริ

IN-HOUSE TRAINING

Professional engineering team

Verification service and Maintain

Modern Tools

Modernly inspection and maintenance tools gain more work efficiency.

Order

Can be shop online with Safesiri all time

Free charge for on-site

Free charge while necessary analytic on-site

Consult with our Technical Team

24 hrs. Consulting service

Service provider by professional engineer team with quality assurance. Verification from standard tools that have been calibrated from ISO/IEC 17025

Was received officially authorized by Council of Engineering, Controller engineering practitioner Juristic Type professional license no. อุท.1702

Certified
Certication

Electrical annual Verification

Quality Assurance: Confident with standardized process as controlled and can be monitored any process. (QMS)

Electrical system Verification
and Certified

Maintain Electrical system
PM Main Distribution Board
(MDB) Air Circuit Breaker
(ACB) and other

General electrical system
maintenance

Maintenance and PM
Electric transformer

Documents in audited was prescribed by the Department of Welfare and the Department of Industrial Works. Also comply with Legal

Electrical drawing service Single Line Diagram

Speedy and inexpensive for Electrical drawing services for government job and make electric circuit

“

Laws announcement
of the Department of
Labor Protection and
Welfare

Ministerial Regulation
Prescribing Safety
Sections for Electrical
Systems in Factories,
2007 (Ministry of Industry)

For occupational safety, Employer shall to arrange the inspection and maintenance the electrical and equipment system. At least once a year as well as record the results of the inspection and certification of the electrical and equipment system.

Entrepreneur must to arrange annual electrical inspection in the factory and ensure safety of electrical system. By an engineer or person assigned by the Minister from the examination and certification, which must be documented as evidence.

PM Electric transformer

PM Main Distribution
Board (MDB)

PM Lightning Rod
and Ground wire

PM other Electrical
equipment

Inspection all kind of crane (PorJor.1 / PorJor.2)

Maintenance and preventive comply with international standards.

Check and test lifting devices

Galvanize wire rope, synthetic wire rope, Lifting Chain, Eye Bolt, D, Bow type Shackle and flat synthetic fiber

Mobile Crane (PorJor.2) inspection

Verification and certified from Professional Engineer

Truck Crane inspection

On site test comply with standard and propose corrective action for working safety

Verification procedure

- 1 Crane structure check**
Main crane structure, welding path, Bolt and nut
- 2 Crane power system check**
Lubrication system, fuel system, cooling system
Powertrain and brake system, motor and power control
- 3 Crane movement check**
Limit switches and lift control operating system
- 4 Roller and wire rope check**
Wire rope diameter breakdown
- 5 Crane alarm**
Brightness and sound alarm system

Crane inspection frequency

1. Construction crane

Lifting capacity not over 3 tons 6 months/time

Lifting capacity over 3 tons 3 months/time

2. General crane

Lifting capacity from 1-3 tons 12 months/time

Lifting capacity over 3-50 tons 6 months/time

Lifting capacity over 50 tons 3 months/time

Tools with calibrated from IEC 17025

Digital hanging scales
Laser Range Meter Inspection Equipment
Digital Vernier
Metal Tape Measure
Sling groove measure
Crane cleaning kit
Amp Meter

24 hrs. Online Database on Cloud

Documents can be downloaded at any time.
Documents not to be lose.
24 hrs. support

Fire Alarm system Inspection

Fire alarm system

Smoke Detector, Heat Detector, Beam Detector

Modernly Equipment and meet standardize.

Obtained ISO 17025

Professional Engineering team.

Legal requirement have to provide Fire detector and alarm throughout the building. According to area suitability especially no one sedentary area or electrical equipment and flammable material area. Must to be equipped an automatic fire detection and alarm that able to alert without electricity

Installation check with consulting as Obtained National Fire Protection Association code 72

24 hrs. Online Support

Quality management standard ISO 9001:2015

Quality assurance ensure in our process up to standard in control and traceable all of our process.

Obtained National Fire Protection Association

FIRE PUMP
